

# NetWorker 19.7.0 has been released

On 06/28/2022 the new NetWorker version 19.7.0.0 with the build no. 35 has been released.

A brief view inside the *Release Notes* made me thinking that with this version especially improvements for the cloudboost support have been introduced:

## New and changed features

Learn about the new and changed features that are introduced in CloudBoost.

This section lists the new and changed features that are introduced in CloudBoost.

- CloudBoost base operating system is upgraded with Ubuntu18.04 Bionic version. Hence, all the packages are upgraded with supported operating system version.
- OpenJDK 8 package is upgraded with Oracle JRE 8 to address security vulnerabilities.
- CloudBoost embedded storage node is upgraded to the version NetWorker Storage Node 19.6.
- Log4j is upgraded from 1.2.17 to 2.17.1 version.

However, the version also implemented nice and important details for the 'ordinary' NetWorker user.

Thanks to Preston de Guise (aka *backupbear*) he has listed them in a new document of his blog. Here is the url:

<https://nsrd.info/blog/2022/07/11/whats-new-in-networker-19-7>

Some of them i will explain in separate documents.
