

# Änderungen am Programm 'nsrwatch' im Vergleich

nsrwatch hat gerade seit der Verfügbarkeit des Visual Mode unter Windows einige Änderungen erfahren. Die Unterschiede fallen Ihnen am ehesten auf, wenn Sie mit *h* die integrierte Hilfestellung aufrufen.

Hier die Gegenüberstellung der Versionen 8.2.3.7 ...

```

nsrwatch 8.2.3.7 Build 1165

Help

Toggle the display of windows using the following keys:
a Alerts      j Jobs      m Messages   p Policies
d Devices     g Groups   o Overview   s Sessions

Some windows have multiple views. To iterate through the views of
a window use the window's key in upper case. For example, to
change the view of the Devices windows, press 'D'.

Use Tab to set the window focus. Once a window has focus, it can
be navigated and adjusted as follows:
<arrow keys>  Scroll a window one row or column
Ctrl-a        Scroll a window to its first column
Ctrl-e        Scroll a window to its last column
Ctrl-b        Scroll a window back a page of rows
Ctrl-f        Scroll a window forward a page of rows
<            Move a window up one position
>            Move a window down one position
+            Grow a window by one row
-            Shrink a window by one row
Enter        Activate a row's action

Press q to exit the program at any time.

To reproduce the current display, set "NSRWATCH=o8d8g5s8m3a"
  
```

und 8.2.4.2:

```

nsrwatch 8.2.4.2 Build 1340

Help

Toggle the display of windows using the following keys:
a Alerts      d Devices   l Libraries  p Policies
b Job Stats  j Jobs      m Messages   s Sessions
c Clones     g Groups   o Overview   t Data Domain

Some windows have multiple views. To iterate through the views of
a window use the window's key in upper case. For example, to
change the view of the Devices windows, press 'D'.

Use Tab to set the window focus. Once a window has focus, it can
be navigated and adjusted as follows:
<arrow keys>  Scroll a window one row or column
Ctrl-a        Scroll a window to its first column
Ctrl-e        Scroll a window to its last column
Ctrl-b        Scroll a window back a page of rows
Ctrl-f        Scroll a window forward a page of rows
<            Move a window up one position
>            Move a window down one position
<            Merge a window to the one above or unmerge from th
>            Merge a window to the one below or unmerge from th
+            Grow a window by one row
-            Shrink a window by one row
Enter        Activate a row's action

Press q to exit the program at any time.

To reproduce the current display, set "NSRWATCH=o10d10g6s10m2a"
